Pre-Fabricated Chimneys

Premier Building Products real brick slip chimneys provide a cost effective and time saving way of adding a chimney to any property.

The chimneys are lightweight, easy to fit and use slips cut from the actual brick of the building, meaning that they are an exact match to the main structure.

Whether the requirement for a chimney is a planning requirement or as an aesthetic detail our chimneys will provide the solution and can be used to accommodate a class 2 working flue if required.

Key Benefits:

- Flexibility of Design Sizes
- Zero Ozone Depletion
- Brick Slips Cut from Bricks off site to match building
- Lightweight
- One Piece, Easy to Fit
- Cost Effective
- Off-site Fabrication
- Full Take-off and Scheduling Service
- Can be Used with a Class 2 Working Flue

Premier Building Products real brick slip chimneys are one piece and manufactured either using a GRP or stainless steel core with 25mm brick slips. GRP provides a more lightweight chimney but with a standard range of size options. Stainless steel provides the designer with a greater amount of flexibility for bespoke products. We are happy to quote for any chimney type and size.

Chimney Types:

- Mid Ridge
- Gable End
- Mono Pitch
- Flat Roof
